COMPREHENSION PASSAGE

Read the Following Passage Aloud Twice and Answer the Questions that Follow :

Kalpana Chawla

Kalpana Chawla was an Indo-American astronaut. She was born on 17th March, 1962, in a small town of Karnal in Haryana. She was just an ordinary girl, who, with her extraordinary courage and work, became a source of encouragement to women all over the world to follow their dreams and work hard to succeed. While other children of her age dressed their Barbie dolls, Kalpana liked to draw the pictures of airplanes.

She first flew on Space Shuttle Columbia in 1997 as a mission specialist and primary robotic arm operator. Her first space mission began on November 19, 1997, as part of the six-astronaut crew that flew the Space Shuttle Columbia flight STS-87.

Chawla was the first Indian-born woman and the second Indian person to fly in space, following cosmonaut Rakesh Sharma who flew in 1984 on the Soyuz T-11. On her first mission, Chawla travelled over 10.4 million miles in 252 orbits of the earth, with more than 372 hours in space.

In 2000, Chawla was selected for her second flight as part of the crew of STS-107.

On January 16, 2003, Chawla went to space aboard Space Shuttle Columbia on STS-107 mission for the last time.

Unfortunately, Chawla was one of the seven crew members killed in the Space Shuttle Columbia disaster.

She will always be remembered for her courage and hard work.
